

## What's happening Wednesday!

Another week has passed and we are that much closer to the opening of camp. Our office is working hard to prepare the programming and facilities for our sessions so that your child has a safe and incredible experience here at Marymount.

As we move forward, I want to REMIND you that the camper test for covid needs to be made no more than **SEVEN** days prior to the start of camp. This is a change from our original request of no more than FOUR days prior. This should give you the time you need to get that done. Once your child has been tested, please be as safe as possible and reduce any undue exposure to others. If your child has been vaccinated you do not have to supply a test result but please provide proof of vaccination for covid 19.

Looking forward to seeing everyone this summer. Have a great rest of the week.

Tommy
